

Aloha Laurence Schott,

It has come to my attention that your company is planning on moving Olelo channels 49, 50, 53, 54 and 55 to new higher numbered channels. Olelo has stated it is opposed to any move, and Olelo has asked for support to leave the channels where they are.

I agree with Olelo and would like to ask that you allow the channels to stay in their current spots. These channels are the people's channels, and over the years, the general public has become very familiar with their current placement. Community channels sometimes take time to get a following, and moving them could negatively impact viewership as you probably know.

I am requesting that you please reconsider your decision and allow the Olelo channels to stay where they are.

Thank you for your time and attention to this matter.

Will Espero
